Profile

I'm an HTML, CSS, and JavaScript-savvy Frontend Web Developer. I am highly interested about learning and putting ideas into action using codes and designs.

I knew I was hooked into the world of web development the instant I printed "Hello World!" in the console of my first application. Web development has never been just a profession for me; it has always been a fun way to keep learning and increase my ability to interpret website UI designs accurately and transform them into responsive websites

My portfolio contains numerous projects that I have created. I'm excited to interact with corporations and companies, as well as teams, to create fantastic websites while also learning.

I'm ready to put my skills to good use while also continuing to grow as a person.

Projects

Admin Dashboard, *HTML | CSS | JavaScript* 🔗

05/2022 – 05/2022

The Admin dashboard provides real-time information to the user from all the data that the website or software collects.

JS Issue Tracker, *HTML | CSS | JavaScript* 🔗

01/2022 – 03/2022

The Issue Tracker is a simple project developed using JavaScript, CSS, and HTML. This project is an interesting project. The user can add the number of issues with their severity level and you can see the details stored in the list form. The user can update once or delete the list items if the user wants to.

Travel Website, *React* 🔗

This website helps ease the stress users go through in trying to choose a place to spend their holiday, to hangout with friends and family or even for business trip.

e.Commerce Website, *HTML | CSS | JavaScript* 🔗

11/2021 – 11/2022

A website that allows people to buy and sell physical goods, services, and digital products over the internet rather than at a brick-and-mortar location. Through an e-commerce website, a business can process orders, accept payments, manage shipping and logistics, and provide customer service.
