Skills

Web Development (*HTML, CSS, JavaScript, Bootstrap, REACT*),

Designs (*Adobe Photoshop, Adobe Illustration*),

Soft Skill (*Resilience & and willing to do more.*),

Version Control (*Git, Gitkraken*),

Technical Skill (*Microsoft Office*)

Profile

I'm an HTML, CSS, and JavaScript-savvy Frontend Web Developer. I am highly interested about learning and putting ideas into action using codes and designs.

I knew I was hooked into the world of web development the instant I printed "Hello World!" in the console of my first application. Web development has never been just a profession for me; it has always been a fun way to keep learning and increase my ability to interpret website UI designs accurately and transform them into responsive websites

My portfolio contains numerous projects that I have created. I'm excited to interact with corporations and companies, as well as teams, to create fantastic websites while also learning.

I'm ready to put my skills to good use while also continuing to grow as a person.

Professional Experience

FRONTEND WEB DEVELOPER, *MOTAD INT*

11/2021 – present

Volunteering to help a not-yet-funded start-up firm create its product with the goal of connecting, networking, and interacting with people all over the world!

- Create and deploy new features.
- Helped with bug fixes.
- In order to work efficiently, I maintained a good relationship.
- Provide a remedy to a non-bug-related issue.

Projects

JS Issue Tracker, *JavaScript Project*

01/2022 – 03/2022

The Issue Tracker is a simple project developed using JavaScript, CSS, and HTML. This project is an interesting project. The user can add the number of issues with their severity level and you can see the details stored in the list form. The user can update once or delete the list items if the user wants to.
